The MERCURY2 GigE PoE series (MER2-G-P) camera is DAHENG IMAGING's new generation industrial digital camera. With improved built-in ISP algorithms, MER2-G-P series camera supports more features. Providing multiple acquisition controls, the camera can adapt to various vision applications.

The MER2-503-23GM/C-P camera is a monochrome/color GigE Vision camera with the Sony IMX264 CMOS sensor. Thanks to the compact design (29mm×29mm×40.3mm), robust metal housings and locking screw connectors, the MERCURY2 cameras can secure the reliability of cameras deployed in harsh environments. The MER2-503-23GM/C-P camera has opto-isolated I/Os. The GPIOs give MER2-G-P cameras maximum flexibility to adapt to specific needs.

The MERCURY2 family cameras are especially suitable for machine vision applications such as industrial inspection, medical, scientific research, education, security and so on.
